APPENDIX D: DSRS CURSOR MOVEMENT AND DATA EDITING KEYS

The following keys are used to move the cursor or edit data for all menus and data entry screens within the DSRS. Refer to the **Keyboard Layout** help screen for the actual keystrokes associated with each key.

KEYS	FUNCTION
Return	Signifies field entry or line termination or moves the cursor to the next field.
Left	*Within a field*, moves the cursor to the left.
Right	*Within a field*, moves the cursor to the right.
Up	Moves the cursor to the field directly above the current one. If there is none, it moves to the last field.
Down	Moves the cursor to the field directly below the current one. If there is none, it moves to the first field.
Page Up	Scrolls the screen to the previous page of data.
Page Down	Scrolls the screen to the next page of data.
Backspace	Deletes the character to the left of the cursor position in the field being edited, and repositions the cursor one position to the left of its previous position.
Delete	Deletes the character at the cursor (or to the right of the cursor when **Insert Mode** is on).
